CAPABILITIES

AI & agents

LLM agent design (Claude API), Model Context Protocol (MCP) servers, prompt systems, human-in-the-loop approval gates, multi-agent orchestration.

Automation & integration

n8n workflow architecture, Make, REST APIs & webhooks, error-handling & retry design, scheduled/cron operations.

Web & documents

HTML/CSS/JS, dashboards & internal tools, automated PDF/DOCX/PPTX generation, print-ready typesetting as code.

Ops & publishing

End-to-end publishing pipelines (Amazon KDP), listing optimisation, multi-platform content operations, analytics-driven iteration.

PROFILE

Self-taught systems builder who designs, ships and operates **production AI automation end-to-end** — from client problem to running system.

Founder of UnifyOps, building AI front-desk automation for service businesses. Trained in the most unforgiving operational environment there is: superyacht service, where safety procedure, uptime and attention to detail are non-negotiable. Capital-lean by principle — every system is built to run near zero cost and without babysitting.

EXPERIENCE

Founder & Systems Architect UnifyOps 2024 — PRESENT

- Design and deliver **AI automation for service businesses**; flagship product is an AI front desk for clinics — inbound call/message handling, triage and appointment booking.
- Architect agent workflows on **n8n + Claude API**: webhook integrations, structured error branches, retries, and human approval gates before anything publishes, sends or pays.
- Operate the business solo and capital-lean — sales, scoping, build, deployment and support.

Founder, Author & Publisher UnifyMind 2024 — PRESENT

- Built an automated **book production pipeline** — manuscript, editing, typesetting, cover and Amazon KDP package — and used it to write and publish *Self Mastery*.
- Run a daily multi-platform **publishing operation** (Instagram, Facebook, TikTok) with scheduled queues, approval workflow and results logging.

Automation Consultant Beach Girls Retreats — Mallorca ONGOING

- Build and maintain the booking, operations and marketing systems for a retreat business — hands-on client work from requirements to running tooling.

Deckhand M/Y Goldrush — Palma de Mallorca PRESENT

- Safety-critical operations, planned maintenance and five-star guest service on a private superyacht — while founding and running two businesses on 10–25 focused hours a week.

SELECTED SYSTEMS SHIPPED

▶ AI_FRONT_DESK Agent that answers, triages and books for clinics — n8n + Claude API, with human-approval gates on every outbound action.	▶ BOOK_FACTORY One-command pipeline from draft manuscript to Amazon-ready package: edit, typeset, cover, KDP metadata.
▶ PUBLISH_OPS Daily content operation across three platforms: queued posts, one-word approval flow, publish, log, follow-up list.	▶ JARVIS_BRAIN Personal AI chief-of-staff: Claude agents governed by an Obsidian knowledge vault, custom skills, and a written trust ledger.
